

CRIPPER

"FUCKIN' THRASH METAL"

BAND INFO

CRIPPER convince with their enthralling mix of old-school and modern Thrash Metal. Served with technical refinement and a lot of groove, they kick ass while being varied and distinct.

Since their founding in 2005, the guys and gal from Hanover left their marks as being a rousing live band, carrying the audience with dashing songs and sweaty shows.

On tours with *Overkill* and *Onslaught*, CRIPPER spread their virus throughout Europe.

Once a big festival got infected, they gladly book the band repeatedly – therefore CRIPPER played several times on festivals like *Summer Breeze*, *Wacken Rocks*, *Metalfest* and *Rockharz Open Air*.

But there's even more – boarding the well-known *70,000 Tons Of Metal* cruise ship from Miami twice, playing the *Brutal Assault* festival in the Czech Republic, shows at the *Bang Your Head*, in Belgium, the Netherlands, Poland, Austria, Switzerland and being invited to enter the stage of the Slovenian *Metaldays 5* (!) times let CRIPPER gain international recognition and a continuously growing fanbase.

So far CRIPPER have released three studio albums and with that formed their distinctive style. Especially on their current album „*Antagonist*“, CRIPPER sound mature and show an exuberant joy of playing.

The creative works of this highly motivated selfmade-team is always showing through in three different aspects: the album artworks, merchandise and so far four complex and artistic music video productions, that the band has self-produced from A to Z.

Having been exposed to CRIPPER at Metaldays 2013, Metal Blade Records will release the upcoming 4th album „*Hyena*“ which is expected for a November release. Giving CRIPPER an extra boost as they march into the future!

„Cripper are awesome. Britta is the best. Thrash Metal can be that authentic. [...] Powerful!“ (*Break The Ground Festival*, report: *Legacy magazine*)
